Designed for Aussie schools.

WHAT IS HUDDL?

Huddl is a mobile app that supports HPE teachers with assessment. We use computer vision and AI to scan motor skills, calculate biomechanics & generate grades. Not only that, teachers can import & manage classes, track progress in a digital gradebook, differentiate, generate feedback, report comments & much more.

WHAT HUDDL DOES NOT DO

Huddl does not:

- Store video footage of students
- Replace teacher judgement
- Assign grades without teacher review
- Share student data across schools
- Use student data for advertising
- Track students outside of school context
- Sell data to third parties
- Identify facial or biometric data

KEY FEATURES:

CLASSES

Import class lists, manage students, and track assessment progress across all your rooms.

ASSESS

Record a skill, let the AI analyse the movement, and get an objective, data-driven grade

INSIGHTS

Track performance, deeper analytics, spot trends & identify where students need support.

REPORTS

Track curriculum coverage, generate report comments & student Journey cards.

ACCOUNT

Manage your school profile, notification settings, & app preferences in one place.

Security, Privacy & School Information.

Student Privacy

Huddl aligns with Australian Privacy Principles (APPs) & DoE AI guidelines.

- Data is securely hosted in Australia on DigitalOcean servers.
- Data is NEVER transferred outside Australia
- Encrypted in transit and at rest
- No advertising or third-party tracking
- No sale of student or school data
- Schools retain ownership of all student data at all times.
- Huddl uses One-Time Password (OTP) authentication for all teacher accounts.
- Students do not have login access

What Huddl Stores

Huddl stores only what is required for assessment and reporting:

- Student name, class & year level
- Teacher name & school details
- Assessment results & data
- Teachers have the option to anonymise names

Huddl Does Not Collect

- Biometric identifiers, facial recognition data, location tracking or behaviour monitoring

Device Requirements

Huddl runs on:

- iOS & iPadOS
- Android

Data deletion

- Schools can request complete deletion of all associated data at any time by contacting admin@huddlapp.com.au

How Skill Grader Works

- Teacher sets up an assessment
- Teacher records a student
- Footage is processed post-recording
- A skeleton overlay is applied and biomechanical results are generated
- Teacher reviews data
- Once all students are assessed, an assessment report is generated.
- Skill Grader records 1 student at a time

Beta Testing

- Launching Term 2, 2026
- Running through Term 4, 2026.
- Participating schools provide structured feedback to improve our services before launch.

Founding Schools Program

- Pre-launch discounted pricing
- \$399 for the first annual subscription
- Up to 1000 students

Pricing

- Annual subscription model
- Base licence + per-student pricing
- Fair pricing that adapts to school size

School Compliance

- Huddl is undergoing the DoE Third Party Services risk assessment process.
- Schools can use Huddl in accordance with the DoE's Students Online in Public Schools procedures by implementing their standard parent notification and consent process.
- We provide a template parent letter to make this straightforward.

Hi families,

Our school is participating in a beta testing program for a brand new app called Huddl. Huddl is an Australian made mobile app that helps HPE teachers assess movement with computer vision and AI.

Huddl is a mobile app used by HPE teachers to assess fundamental movement skills. The teacher uses a school device to record a short video clip of a student performing a skill. Next, Huddl analyses key biomechanical indicators to produce assessment data. The teacher reviews the result before any grade is assigned. An important note is that video clips are never saved or stored. Students do not have login access to Huddl. The app is a teacher-facing tool only.

WHAT IS A BETA TESTING PROGRAM?

The Huddl beta program gives schools early access to test the app before its full launch. It's an exciting opportunity to help shape a new tool for HPE teachers across Australia. During the beta, video clips are processed on the teacher's device and deleted immediately after movement data is extracted. No video is saved or sent anywhere.

WHAT INFORMATION IS STORED?

Huddl stores only what's needed for assessment:

- Your child's name, class, and year level
- Assessment results
- Teacher and school details

IS MY CHILD'S INFORMATION SAFE?

Yes. Here's how:

- All data is stored securely in Australia
- Your child's info is never shared with other schools or third parties
- Huddl does not use student data for advertising
- No facial recognition or biometric data is collected
- Your school owns your child's data and can request it be deleted at any time

WHAT HUDDL DOES NOT DO

- Store video footage of your child
- Collect facial recognition or biometric identifier data
- Share your child's data with other schools or third parties
- Use student data for advertising
- Track students outside of a school assessment context
